COVID-19 Resources for Non-English Speakers

Today, more than 21% of Americans speak a language other than English at home. These individuals face challenges in the U.S. healthcare system, which are exacerbated by coronavirus. The following resources provide multi-lingual COVID-19 information.

1

Centers for Disease Control and Prevention

Offers free print and online resources on a variety of topics related to coronavirus in multiple languages

2

World Health Organization

Shares important global and country-specific information in a variety of languages with regular updates

3

COVID-19 Health Literacy Project

Houses accessible, evidence-based fact sheets in 30+ languages to help all patients know when and how to seek care

4

El Planeta - Boston's Latino Daily

Redistributes COVID-19 health news in Spanish

5

Washington State Department of Health

Features resources in a variety of languages

6

EMBARC Crisis Response

Offers resources and a crisis helpline in partnership with 30 immigrant and refugee led faith and community organizations in six cities across Iowa

7

Luna360 COVID-19 Multilingual Resource Center

Gathers translated materials with information from national and local organizations

8

Massachusetts Department of Health

Shares a variety of tools, including a visual communication tool for people who are deaf, hard of hearing or do not speak English
